ATCF Reconciliation to GAAP

Reconciliation To GAAP Information (\$ in millions)

	Years Ended 12/31						
	2006 Actual	2007 Estimate (a)		2008 Estimate (a)			
Net Income (GAAP)	274	280	—	305	265	—	295
Depreciation, depletion and amortization	142	160	—	160	180	—	180
Deferred income taxes, net	98	0	—	0	50	—	50

Net Cash Provided by Operating Activities (GAAP)	483	430	—	455	505	—	545

(a) The U.S. Securities and Exchange Commission (SEC) requires public companies, such as Energen, to reconcile Non-GAAP (GAAP refers to generally accepted accounting principles) financial measures to related GAAP measures. After-tax Cash Flow is a Non-GAAP financial measure. Energen believes after-tax cash flow is relevant because it is a measure of cash available to fund the company's capital expenditures, dividends and to service its debt.

This estimate is a "forward-looking statement" as defined by the SEC. All statements based on future expectations rather than on historical facts are forward-looking statements that are dependent on certain events, risks and uncertainties that could cause actual results to differ materially from those anticipated. The Company cannot guarantee the absence of errors in input data, calculations and formulas used in its estimates, assumptions and forecasts. A discussion of risks and uncertainties that could affect future results of Energen and its subsidiaries is included in the Company's periodic reports filed with the Securities and Exchange Commission.
