**FOR IMMEDIATE RELEASE**

## **Jay W. Kelley Joins ManTech International Corporation**

FAIRFAX, VA — April 24, 2003 – ManTech International Corporation (Nasdaq: MANT), a Fairfax, Virginia-based IT and technical services solution provider supporting Department of Defense and intelligence community customers, announced today that Jay W. Kelley has joined ManTech International as a Senior Vice President in the National Security Solutions Group. Mr. Kelley will be based in Colorado Springs, CO and will have primary responsibility for ManTech's business relating to Department of Defense and intelligence community space programs and other Midwest operations.

Mr. Kelley joined ManTech from Lockheed Martin Technical Operations where he had served as Vice President of Military Operations since 2000. From 1997 to 2000, Mr. Kelley was Chief Operating Officer of System Technology Associates.

In 1996, Mr. Kelley retired from the United States Air Force as a Lieutenant General after more than 30 years of distinguished service. A graduate of the U.S. Air Force Academy, Mr. Kelley's last two assignments with the Air Force were as Vice Commander of the Air Force Space Command at Peterson Air Force Base in Colorado Springs, CO. and as Commander of Air University at Maxwell Air Force Base in Alabama. Mr. Kelley also has a Masters Degree in Political Science from Auburn University.

"Expanding ManTech's business in support of military and intelligence space programs is a key priority, and we are pleased to welcome Jay Kelley to the ManTech team to lead the effort," stated Evan Hineman, ManTech International Corporation (ManTech) Executive Vice President and President of ManTech's National Security Solutions Group, the lead ManTech business unit supporting DoD and intelligence community programs.

Hineman continued, "Jay understands the critical importance of space programs and operations across the DoD and intelligence community—he has a great mix of commercial business skills and military experience that will greatly benefit ManTech."

Mr. Kelley noted that expanding ManTech's presence in Colorado Springs will be his primary focus due to the high concentration of priority customers such as Air Force Space Command, USNORTHCOM, NORAD, and Army Space Command. Kelley concluded, "I have been impressed with ManTech's broad range of space and IT capabilities, and I am confident that we can make solid progress in this fast-growing market arena."

**About ManTech International Corporation:**

Headquartered in Fairfax, Virginia, ManTech International Corporation delivers a broad array of information technology and technical services solutions to U.S. federal government customers, focusing primarily on critical national defense programs for the intelligence community and Department of Defense. ManTech designs, develops, procures, implements, operates, tests and maintains mission-critical, enterprise information technology and communication systems and infrastructures for federal government customers in the United States and 34 countries worldwide. Additional information on ManTech can be found at [www.mantech.com](http://www.mantech.com).

Statements made in this press release which do not address historical facts could be interpreted to be forward-looking statements. Examples of such forward looking statements include the assertion that the military and intelligence space market is a fast growing market and the company's ability to penetrate such market. Such statements are subject to factors that could cause actual results to differ materially from anticipated results. The factors that could cause actual results to differ materially from those anticipated include, but are not limited, to the following: failure of the military and intelligence space market to expand, failure of marketing efforts to realize any military and intelligence space market work, failure of government customers to exercise options under contracts; funding decisions of U.S. Government projects; government contract procurement (such as bid protest) and termination risks; competitive factors such as pricing pressures and/or competition to hire and retain employees; material changes in laws or regulations applicable to the company's businesses and other risk factors discussed in the company's filings with the Securities and Exchange Commission. The statements in this press release are made as of April 24, 2003, and the Company undertakes no obligation to update any of the forward-looking statements made herein, whether as a result of new information, future events, changes in expectations or otherwise.
