

OKLAHOMA'S IMPROVED DRIVER LICENSES AND ID CARDS

Beginning in the Fall 2003, the Oklahoma Department of Public Safety will begin issuing new Driver Licenses and Identification Cards. These documents have a new look; and provide a number of important features addressing those issues which make altering, tampering or counterfeiting these documents more difficult;

Every cardholder's demographic information, digital portrait with 'ghosted' image, and two signatures are printed onto a highly durable plastic card.

A 'security' laminate coating covers each card. This feature increases the durability and tamper resistance of the document.

Note that the orientation for all 'under 21' cardholders will be vertical instead of horizontal. Every card shows the date when the individual turns '18' or '21'. These features also make the card immediately recognizable as an 'under age' document.

To identify documents at a glance, note the color of the Oklahoma map portrayed on the bottom right corner of each document: Blue for Driver License, Yellow for Commercial Driver License (CDL) and Red for Identification Card (ID). The color of document header will always match the color of the map.

Two types of barcodes appear on the back of the License and ID. The horizontal two dimensional (2D) barcode contains demographic information found on the front of the card and the vertical one dimensional (1D) barcode contains document number and birthdate.
