#### What is Strategy?

Competitive strategy is all about being different.
It means choosing a different set of activities to deliver a mixed set of values to your chosen customer base.

A company can outperform rivals only if it can establish a difference that it can preserve.

#### 3 Types of Strategies

Cost Strategy – competing on the basis of low costs

Product Strategy – competing by differentiating products through quality and performance

Solutions Strategy – competing based on providing value–added solutions

#### **Strategies of Successful Companies**

Wal-Mart - Cost

"Lower the total cost of living for everyone everywhere."

#### **Strategies of Successful Companies**

Sony – Product

"To be the leading quality manufacturer of audio, video, communications and information technology products for the consumer and professional markets"

#### Strategies of Successful Companies

**Disney – Solutions** 

"To leverage creativity to dominate multiple venues where people spend their leisure time"

### Strategy of Rival Companies

Big Box Competitors like
Best Buy and Circuit City – Cost

"To have a dominant selection of everything in consumer electronics at the lowest price"

#### RadioShack's Strategy???

Limited
To have a dominant selection of

everything in consumer electronics

High
at Low prices.

### NOT RadioShack's Strategy !!!

Limited
To have a dominant selection of

everything in consumer electronics

High
at Low prices.

#### Where does Strategy Come From?

Competitive strategy should be based upon a set of <u>unique</u> customer insights.

Many customers are confused about certain electronic categories and are not sure what they need to solve their problems.

These customers will value someone who can customize solutions in a cost-effective manner and will remain loyal to that provider.

Many customers are confused about certain electronic categories and are not sure what they need to solve their problems.

These customers will value someone who can customize solutions in a COST-EFFECTIVE MANNER and will remain loyal to that provider.

Customers have many simple electronic needs (accessories, batteries, and other enabling devices) they want fulfilled in a simple, easy manner, where convenience, selection, quality, simplicity, answers, and fair price, matter.

Customers want unique electronic products that allow them to project their individual personality, experience more fun or enjoyment, or solve problems in their lives.

All customer segments are not created equal.

A company that aligns its activities to meet or exceed these customer requirements can obtain and sustain a long-term competitive advantage.

#### 3 Target Segments For RSH

- 1. Suburban Families convenience oriented, driven by emerging products.
- Urban Dwellers follow trends closely, ethnically diverse.
- 3. Small-town Homebodies late boomers, with time and money.

#### 3 Major RSH Segments

They represent 37% of the American population.

Collectively, they spend:
46% of total consumer electronics category,
52% of RadioShack sales.

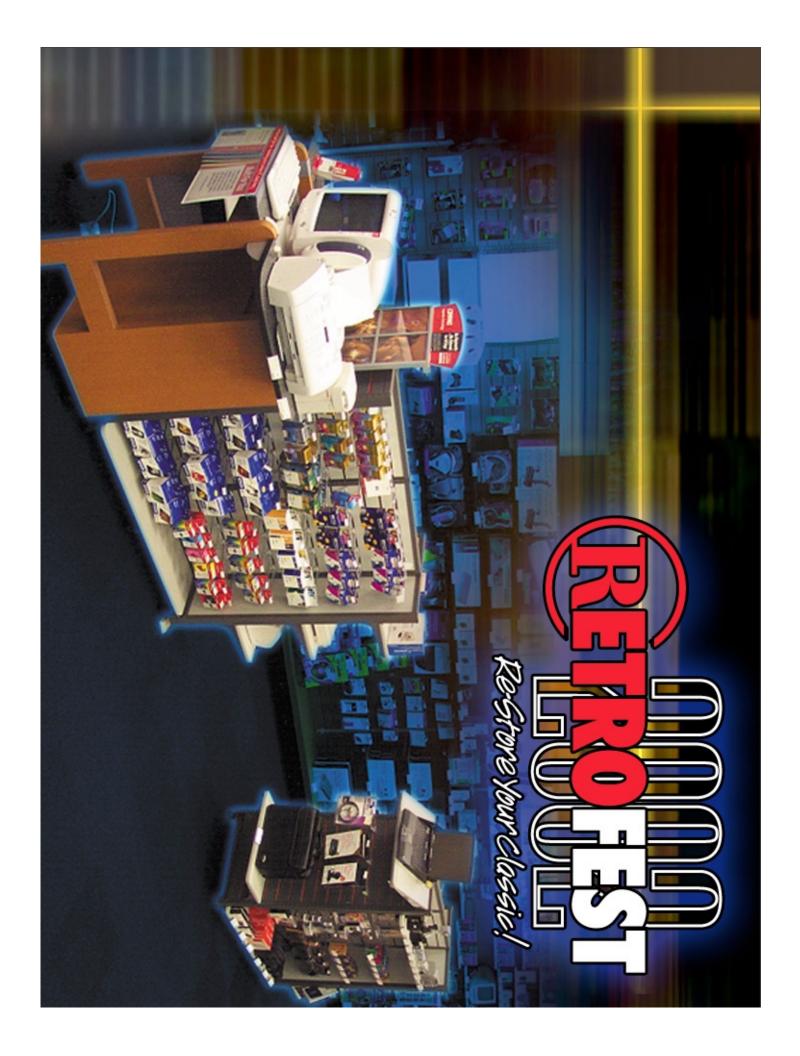

#### 4 Critical CE Consumer Insights

- 1. Consumers need help.
- 2. Quick and easy access to routine electronic products.
- 3. Consumers want unique products.
- 4. Family centric target segments.

"To dominate cost – effective solutions to meet everyone's routine electronics needs, and families' distinct electronics wants."

"To dominate cost – effective solutions to meet everyone's routine electronics needs, and families' distinct electronics wants."

- Dominate
- Cost Efficient
- Solutions
- Everyone's
- Routine Electronics Needs
- Families'
- Distinct Electronic Wants

"To dominate cost – effective solutions to meet everyone's routine electronics needs, and families' distinct electronics wants."

#### **Desired Outcome Of RSH Solutions Strategy**

#### STRATEGIC RESULTS

Satisfied SHAREHOLDERS

Increase shareholder value

Delighted CUSTOMERS

Growing base of satisfied customers Efficient & Effective PROCESSES

Superior operational execution & efficiency

Motivated & Prepared WORKFORCE

A capable, motivated & technology-enabled workforce
