

**** MEDIA ADVISORY ****

**INDUSTRIAL NATURAL GAS CONSUMERS & NATURAL GAS PRODUCERS
CALL FOR GOVERNMENT ACTION
“SOLUTIONS FOR AMERICA”**

**NATIONAL PRESS CLUB
WASHINGTON D.C.
MARCH 28, 2006
9:30 – 11:00 A.M. EST**

Washington D.C. – March 22, 2006 – CEOs from some of the nation’s largest industrial natural gas consumers and independent natural gas producers will host a press conference in Washington D.C. on March 28, 2006. At the conference, executives will call on Congress and the Administration to take immediate action to address the dwindling U.S. natural gas supply. Increasing supply would reduce and stabilize natural gas prices for consumers.

Speaking at the news conference will be:

Stephen R. Wilson
Chairman & CEO
CF Industries Holdings, Inc.

J. Larry Nichols
Chairman & CEO
Devon Energy Corporation

Dan DiMicco
President & CEO
Nucor Corporation

James T. Hackett
Chairman, President & CEO
Anadarko Petroleum Corporation

Laurence M. Downes
Chairman & CEO
NJ Resources

During the presentation, the speakers will outline solutions that would immediately address problems facing North America’s natural gas industry. In addition, they will discuss how American consumers and energy producers working together with lawmakers and regulatory agencies can increase critical supplies of natural gas, lower prices for consumers, keep American jobs and businesses strong and protect America’s economic security. Executives will also answer questions from participating journalists.

The event will be held at The National Press Club at **529 14th Street, NW, Washington D.C.** and will be webcast live at <http://www.ConnectLive.com/events/naturalgas> .

Corporate profiles for participating organizations follow.

CF Industries Holdings, Inc.

CF Industries Holdings, Inc. is one of North America's largest manufacturers and distributors of nitrogen and phosphate fertilizer products, capable of producing more than 8 million tons of fertilizer annually. The company operates nitrogen production facilities in Louisiana and Alberta and phosphate production facilities in Florida, as well as 49 fertilizer distribution locations. At capacity, CF Industries' nitrogen operations consume approximately 350,000 mmBTU of natural gas each day. Revenues in 2005 were \$1.9 billion and total employment is approximately 1,400.

Devon Energy

Devon Energy Corporation is the largest U.S.-based independent oil and gas producer and one of the larger independent processors of natural gas and natural gas liquids in North America. The company's portfolio of oil and gas properties provides stable, environmentally responsible production and a platform for future growth. About 88 percent of Devon's production is from North America. The company also operates in selected international areas, including Brazil, West Africa, Azerbaijan and China. The company's production mix is 62 percent natural gas and 38 percent oil and natural gas liquids, such as propane, butane and ethane. Devon produces 2.2 billion cubic feet of natural gas each day, about 3 percent of all the gas consumed in North America.

Headquartered in Oklahoma City, Devon has approximately 4,000 employees worldwide.
