Doug, based on your suggestion, I resorted the telephone call detail database and discovered an error in the search criteria. I've corrected the problem and ran a new search of all Topeka GO and SF based calls from 9/21/01 through 10/17/01. Here are the results:

Phone Log Hits 10-18-01.

The list is sorted by name. All calls shown originated within the Company telephone network. For the Topeka 818, 800 and SF buildings, we have the technology to determine which extension made the call. For other locations, we only know the area the call came from and not the extension.

As of today, the Topeka GO 11th floor and all incoming calls will be included in the call detail database.

Please call me with any questions.

thanks.

Mike Brozek
Senior Director IT Infrastructure
