Intelligence and Information Systems

Mike Keebaugh, *President*

Intelligence and Information Systems (IIS), with 2007 sales of \$2.7 billion, is a leading systems and solutions provider to government customers in the United States and internationally. IIS capabilities extend beyond intelligence, surveillance and reconnaissance to include Department of Defense/civil space, homeland security, federal information technology and information assurance.

IIS has established itself as the premier provider of command and control systems capable of transforming data into actionable intelligence. Through its ground integration initiative, IIS is helping to create a more

integrated and collaborative intelligence community. Using advanced software technologies, IIS is integrating separate systems into a highly effective enterprise solution—allowing customers to rapidly adapt to their changing needs.

IIS is also helping the U.S. Air Force to develop the system design for the next-generation Global Positioning System (GPS) Control Segment for satellite communications. Through this effort, IIS is providing command, control and mission support for current GPS Block II and all future satellites as well as supporting existing and new interfaces.
